

WEEK 5 HANDSON

Scrum Master for next week

- Zaya and Danielle

List at least 5 things the team did well and will continue doing

- Presentation prepared
- We worked on visualization
- We worked on what the team member did not understand and explained each other
- We wrapped up everything we did

List at least 3 things the team did poorly and how you will mitigate them next sprint

- We did our best
- We are still learning to use Github

List shout-outs to any team members for excelling in any way\

Danielle and Zaya work well together

We are getting closer to completing the project

What did you learn as a team this week?

- We learned that there was a third subject category called TOT

What did you learn as an individual this week?

- I learned how to commit changes on Github
- I practiced how to pull and push in Github again
- I learned that there are specific results we are not able to work on in Python. In order to find the more accurate result, we needed to work on R as recommendation

Code Review

Please submit all project documents related to your efforts this week, including all code used. If you used Tableau, please take screenshots. Your code will be graded on the following four criteria:

Does your code run smoothly from the top to the bottom of the file?

- Yes it does

Do you have comments explaining what you're doing before you do it?

- Yes I do

Are you working on the appropriate weekly task (i.e. data exploration)?

- Yes I am.

Do you have comments explaining your interpretation of the code results (if applicable) after the code?

- Yes I do
